Declaration of Compliance

We hereby certify that the ADEQID Mini 8 mm and ADEQID Standard 12 mm microchips, manufactured and supplied by BARTMED, comply with the requirements of ISO 11784 and ISO 11785.

These microchips are designed for permanent implantation and lifetime identification of animals. Compliance with ISO 11784/11785 has been independently verified by the International Committee for Animal Recording (ICAR), the designated registration authority for RFID devices used in animal identification. BARTMED has been assigned the ICAR manufacturer code 932.

Microchips supplied to the Swedish market are identified by product codes 932001 and 932002. The Swedish Board of Agriculture (Jordbruksverket) has allocated the following identification number range for these products:

752 0 932 0000 0000 - 752 0 932 9999 9999

To ensure continued compliance with the applicable ISO standards, ADEQID microchips are subjected to regular conformance testing every five years by an ICAR-approved laboratory.

Sincerely yours

Joanna Moritz
