# Premium Capability. Easy Mobility

## M9Vet – Premium Hand-Carried Ultrasound System

### Technologies at an All New Level

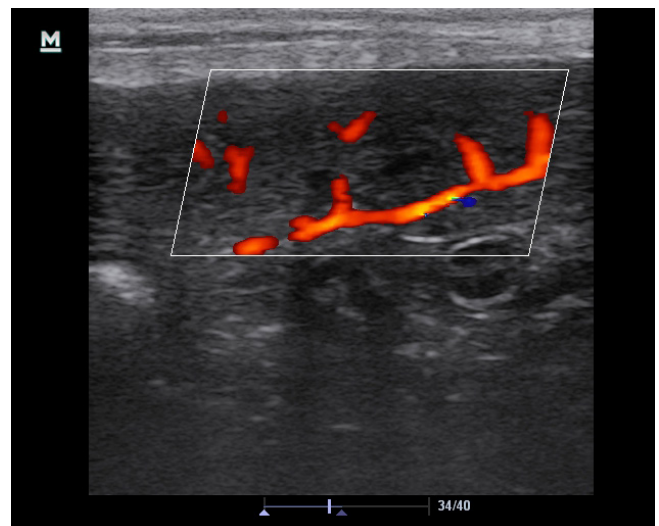

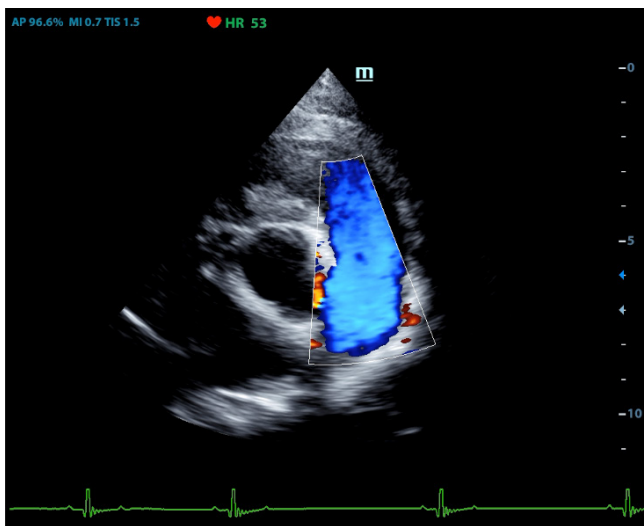

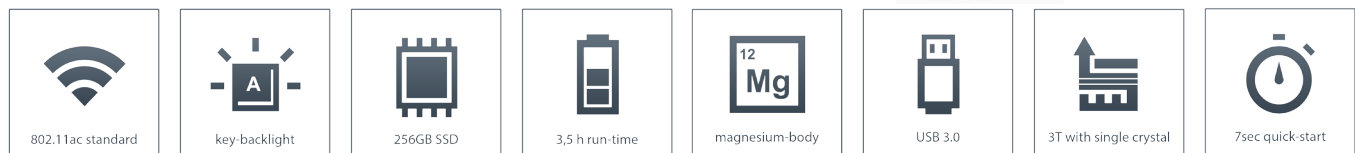

- Advanced multi-beam formation to highly increase the frame rate
- Patented 3T transducer technology with single crystal
- Echo Boost™: 2D Echo optimization and enhancement technology
- HDR Flow: High dynamic range color flow technology
- HR Flow: High resolution color flow technology

### Developed for Veterinary Examination

- iWorks™: Standardized workflow with flexible user-define capability
- iStation™: Efficient patient data management system
- iZoom™: One key for screen zooming
- MedSight: Direct data transfer between ultrasound system and smart phone
- DICOM/HL7: DICOM 3.0 and HL7

### Innovative Green Design

- 15" LED HD monitor with automatic brightness adjustment
- Ultra-light 1.6mm Magnesium alloy main unit case
- Inbuilt battery solutions to support Max. 3.5h continuous scanning
- Reliable RoHS certified materials

Seven advantages, one underlying thought. The new M9 perfectly exemplifies our philosophy.

Mindray solutions pave the way for faster medical help and professional action. They help in the here and now and offer a glimpse of the future. For further information please send your enquiries to [intl-uis@mindray.com](mailto:intl-uis@mindray.com)
