VET

Ultrasound scanner *iScan mini*

iScan mini is the answer to the voice of veterinarians working in the field. Simple to use, it has a brilliant image and is not much bigger than your phone! It is an indispensable tool in the work of every veterinarian dealing with the reproduction of farm animals. Light and handy, it was created to make your work easier.

LIGHTWEIGHT

The ready-to-go iScan mini weighs only 1.35 kg. Even long hours of work will not be a burden.

DURABLE

iScan mini, slightly larger than the palm of the hand, is extremely durable because its housing is made of aluminum.

WIFI CONNECTIVITY

Built-in WiFi antenna and free application allow you to quickly share images and cineloops.

AUTOMATIC FOLLICLE MEASUREMENT

You no longer have to wonder where the follicle size is greatest. iScan mini does it for you.

OPTIMIZED WORKFLOW

Easy-to-program keys that can be adapted to your needs.

SHARP IMAGE

LuciD is a function to reduce noise and improve image clarity.

SPEED AND PRIORITY SELECTION

Choose between 128 and 256 lines composite image, adjust the appropriate refresh rate and resolution.

SCREEN AND GOGGLES

Use the built-in screen or OLED goggles. The image will always be clear and contrasting.
